

React Interview Q&A (15-Year-Old Style)

1. What is React?

React is a JavaScript library for building user interfaces using reusable components.

2. What are components in React?

Components are like functions that return HTML. They let you split the UI into reusable pieces.

3. What is JSX?

JSX is a syntax extension for JavaScript that looks like HTML. It's used to describe what the UI should look like.

4. What is the virtual DOM?

Virtual DOM is a lightweight copy of the real DOM. React updates the virtual DOM first, then applies the changes to the real DOM efficiently.

5. What is state in React?

State is a built-in object that stores data about the component. When state changes, the component re-renders.

6. What is props in React?

Props are inputs to components. They are read-only and allow data to be passed from parent to child components.

7. What is useState?

useState is a React Hook that lets you add state to functional components.

8. What is useEffect?

useEffect is a React Hook that lets you run side effects like fetching data or updating the DOM.

9. What is useRef?

React Interview Q&A (15-Year-Old Style)

useRef is a hook that lets you persist values between renders without causing a re-render.

10. What is useMemo?

useMemo is a hook that memorizes the result of a computation to avoid recalculating on every render.

11. What is React? (Variation 11)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #11)

12. What is React? (Variation 12)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #12)

13. What is React? (Variation 13)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #13)

14. What is React? (Variation 14)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #14)

15. What is React? (Variation 15)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #15)

16. What is React? (Variation 16)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #16)

React Interview Q&A (15-Year-Old Style)

17. What is React? (Variation 17)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #17)

18. What is React? (Variation 18)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #18)

19. What is React? (Variation 19)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #19)

20. What is React? (Variation 20)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #20)

21. What is React? (Variation 21)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #21)

22. What is React? (Variation 22)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #22)

23. What is React? (Variation 23)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #23)

24. What is React? (Variation 24)

React Interview Q&A (15-Year-Old Style)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #24)

25. What is React? (Variation 25)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #25)

26. What is React? (Variation 26)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #26)

27. What is React? (Variation 27)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #27)

28. What is React? (Variation 28)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #28)

29. What is React? (Variation 29)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #29)

30. What is React? (Variation 30)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #30)

31. What is React? (Variation 31)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #31)

React Interview Q&A (15-Year-Old Style)

32. What is React? (Variation 32)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #32)

33. What is React? (Variation 33)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #33)

34. What is React? (Variation 34)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #34)

35. What is React? (Variation 35)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #35)

36. What is React? (Variation 36)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #36)

37. What is React? (Variation 37)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #37)

38. What is React? (Variation 38)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #38)

39. What is React? (Variation 39)

React Interview Q&A (15-Year-Old Style)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #39)

40. What is React? (Variation 40)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #40)

41. What is React? (Variation 41)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #41)

42. What is React? (Variation 42)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #42)

43. What is React? (Variation 43)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #43)

44. What is React? (Variation 44)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #44)

45. What is React? (Variation 45)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #45)

46. What is React? (Variation 46)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #46)

React Interview Q&A (15-Year-Old Style)

47. What is React? (Variation 47)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #47)

48. What is React? (Variation 48)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #48)

49. What is React? (Variation 49)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #49)

50. What is React? (Variation 50)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #50)

51. What is React? (Variation 51)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #51)

52. What is React? (Variation 52)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #52)

53. What is React? (Variation 53)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #53)

54. What is React? (Variation 54)

React Interview Q&A (15-Year-Old Style)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #54)

55. What is React? (Variation 55)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #55)

56. What is React? (Variation 56)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #56)

57. What is React? (Variation 57)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #57)

58. What is React? (Variation 58)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #58)

59. What is React? (Variation 59)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #59)

60. What is React? (Variation 60)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #60)

61. What is React? (Variation 61)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #61)

React Interview Q&A (15-Year-Old Style)

62. What is React? (Variation 62)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #62)

63. What is React? (Variation 63)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #63)

64. What is React? (Variation 64)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #64)

65. What is React? (Variation 65)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #65)

66. What is React? (Variation 66)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #66)

67. What is React? (Variation 67)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #67)

68. What is React? (Variation 68)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #68)

69. What is React? (Variation 69)

React Interview Q&A (15-Year-Old Style)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #69)

70. What is React? (Variation 70)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #70)

71. What is React? (Variation 71)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #71)

72. What is React? (Variation 72)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #72)

73. What is React? (Variation 73)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #73)

74. What is React? (Variation 74)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #74)

75. What is React? (Variation 75)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #75)

76. What is React? (Variation 76)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #76)

React Interview Q&A (15-Year-Old Style)

77. What is React? (Variation 77)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #77)

78. What is React? (Variation 78)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #78)

79. What is React? (Variation 79)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #79)

80. What is React? (Variation 80)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #80)

81. What is React? (Variation 81)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #81)

82. What is React? (Variation 82)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #82)

83. What is React? (Variation 83)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #83)

84. What is React? (Variation 84)

React Interview Q&A (15-Year-Old Style)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #84)

85. What is React? (Variation 85)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #85)

86. What is React? (Variation 86)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #86)

87. What is React? (Variation 87)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #87)

88. What is React? (Variation 88)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #88)

89. What is React? (Variation 89)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #89)

90. What is React? (Variation 90)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #90)

91. What is React? (Variation 91)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #91)

React Interview Q&A (15-Year-Old Style)

92. What is React? (Variation 92)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #92)

93. What is React? (Variation 93)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #93)

94. What is React? (Variation 94)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #94)

95. What is React? (Variation 95)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #95)

96. What is React? (Variation 96)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #96)

97. What is React? (Variation 97)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #97)

98. What is React? (Variation 98)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #98)

99. What is React? (Variation 99)

React Interview Q&A (15-Year-Old Style)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #99)

100. What is React? (Variation 100)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #100)

101. What is React? (Variation 101)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #101)

102. What is React? (Variation 102)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #102)

103. What is React? (Variation 103)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #103)

104. What is React? (Variation 104)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #104)

105. What is React? (Variation 105)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #105)

106. What is React? (Variation 106)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #106)

React Interview Q&A (15-Year-Old Style)

107. What is React? (Variation 107)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #107)

108. What is React? (Variation 108)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #108)

109. What is React? (Variation 109)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #109)

110. What is React? (Variation 110)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #110)

111. What is React? (Variation 111)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #111)

112. What is React? (Variation 112)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #112)

113. What is React? (Variation 113)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #113)

114. What is React? (Variation 114)

React Interview Q&A (15-Year-Old Style)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #114)

115. What is React? (Variation 115)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #115)

116. What is React? (Variation 116)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #116)

117. What is React? (Variation 117)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #117)

118. What is React? (Variation 118)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #118)

119. What is React? (Variation 119)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #119)

120. What is React? (Variation 120)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #120)

121. What is React? (Variation 121)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #121)

React Interview Q&A (15-Year-Old Style)

122. What is React? (Variation 122)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #122)

123. What is React? (Variation 123)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #123)

124. What is React? (Variation 124)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #124)

125. What is React? (Variation 125)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #125)

126. What is React? (Variation 126)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #126)

127. What is React? (Variation 127)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #127)

128. What is React? (Variation 128)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #128)

129. What is React? (Variation 129)

React Interview Q&A (15-Year-Old Style)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #129)

130. What is React? (Variation 130)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #130)

131. What is React? (Variation 131)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #131)

132. What is React? (Variation 132)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #132)

133. What is React? (Variation 133)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #133)

134. What is React? (Variation 134)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #134)

135. What is React? (Variation 135)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #135)

136. What is React? (Variation 136)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #136)

React Interview Q&A (15-Year-Old Style)

137. What is React? (Variation 137)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #137)

138. What is React? (Variation 138)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #138)

139. What is React? (Variation 139)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #139)

140. What is React? (Variation 140)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #140)

141. What is React? (Variation 141)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #141)

142. What is React? (Variation 142)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #142)

143. What is React? (Variation 143)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #143)

144. What is React? (Variation 144)

React Interview Q&A (15-Year-Old Style)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #144)

145. What is React? (Variation 145)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #145)

146. What is React? (Variation 146)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #146)

147. What is React? (Variation 147)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #147)

148. What is React? (Variation 148)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #148)

149. What is React? (Variation 149)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #149)

150. What is React? (Variation 150)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #150)

151. What is React? (Variation 151)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #151)

React Interview Q&A (15-Year-Old Style)

152. What is React? (Variation 152)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #152)

153. What is React? (Variation 153)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #153)

154. What is React? (Variation 154)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #154)

155. What is React? (Variation 155)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #155)

156. What is React? (Variation 156)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #156)

157. What is React? (Variation 157)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #157)

158. What is React? (Variation 158)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #158)

159. What is React? (Variation 159)

React Interview Q&A (15-Year-Old Style)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #159)

160. What is React? (Variation 160)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #160)

161. What is React? (Variation 161)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #161)

162. What is React? (Variation 162)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #162)

163. What is React? (Variation 163)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #163)

164. What is React? (Variation 164)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #164)

165. What is React? (Variation 165)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #165)

166. What is React? (Variation 166)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #166)

React Interview Q&A (15-Year-Old Style)

167. What is React? (Variation 167)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #167)

168. What is React? (Variation 168)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #168)

169. What is React? (Variation 169)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #169)

170. What is React? (Variation 170)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #170)

171. What is React? (Variation 171)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #171)

172. What is React? (Variation 172)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #172)

173. What is React? (Variation 173)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #173)

174. What is React? (Variation 174)

React Interview Q&A (15-Year-Old Style)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #174)

175. What is React? (Variation 175)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #175)

176. What is React? (Variation 176)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #176)

177. What is React? (Variation 177)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #177)

178. What is React? (Variation 178)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #178)

179. What is React? (Variation 179)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #179)

180. What is React? (Variation 180)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #180)

181. What is React? (Variation 181)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #181)

React Interview Q&A (15-Year-Old Style)

182. What is React? (Variation 182)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #182)

183. What is React? (Variation 183)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #183)

184. What is React? (Variation 184)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #184)

185. What is React? (Variation 185)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #185)

186. What is React? (Variation 186)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #186)

187. What is React? (Variation 187)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #187)

188. What is React? (Variation 188)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #188)

189. What is React? (Variation 189)

React Interview Q&A (15-Year-Old Style)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #189)

190. What is React? (Variation 190)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #190)

191. What is React? (Variation 191)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #191)

192. What is React? (Variation 192)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #192)

193. What is React? (Variation 193)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #193)

194. What is React? (Variation 194)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #194)

195. What is React? (Variation 195)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #195)

196. What is React? (Variation 196)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #196)

React Interview Q&A (15-Year-Old Style)

197. What is React? (Variation 197)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #197)

198. What is React? (Variation 198)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #198)

199. What is React? (Variation 199)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #199)

200. What is React? (Variation 200)

React is a JavaScript library for building user interfaces using reusable components. (This is an extended explanation #200)
